Education

University of Oregon

Master of Computer Science, June 2017

Bachelor of Computer Science, June 2015

Skills

Programming Languages:

Java, C#, Python, JavaScript, jQuery, AJAX

Database Servers:

SQL SERVER, MySQL, Oracle DB, MongoDB, Firebase

Cloud Service:

Google App Engine, AWS

Certification

MSCA: SQL 2012 / 2014

MSCA: SQL 2016 BI Developer

Work Experience

Software Development Engineer, Amazon, Seattle, WA

Oct 2020 – Now

Working in AB - ESI team to focus on business invoice generation.

- Created service environment and APIs to serve upstream services for JP E-Invoice project.
- Refactor running services to support new features without service disruption for customers.
- Become a great Oncall to prioritize, category, tracking, and document each ticket.

Software Developer, Horizon Tire Company, Greater Los Angeles, CA

Oct 2019 – Oct 2020

An auto tire distributor focused on E-Commerce and wholesales.

- Developed an E-Commerce Fulfillment software in C# language to process orders from Teapplix which is a middleware to integrate orders from Walmart and Amazon.
- Customized web-based ERP systems for accounting, purchasing, and inventory management implemented by Ant Design and .Net Core.
- Designed Restful APIs to exchange wholesales orders in .Net Core framework and MVP pattern.
- Deployed SQL Server Reporting Service to generate Sale Performance Report that increased 15% sales in Walmart.

Software Developer, Sun West Mortgage Company, Greater Los Angeles, CA

March 2018 – Aug 2019

A mortgage service supplier for borrowers, brokers, and other lenders.

- Analyzed user requirements to developed web-based Loan Management applications in Java programming language with agile methodology.
- Reconstructed moveable and extendable modules to optimize systems that used Beans container in Java Spring framework.
- Created a concurrency API Distributor to integrate existing APIs that implemented by Java Servlet component.
- Designed a Data Change Handler system that reduces 70% time to centrally monitor loan changes in loan applications.

Personal Projects

IMDB-Learning: [Link](#)

A classification to predict the movie ranking score with three benchmarks: accuracy, time cost, and mean error.

- Pre-analyzed classified attributes with Weka to choose 3 stable algorithms and 3 unstable algorithms.
- Cleaned data via data filling, tuple deduplication, and feature deletion that gained 30% accuracy.
- Filtered useful Stand Score Normalization and Bag-of-words transformation which obtained 42% accuracy.
- Built an ensemble by Bootstrap Aggregating which utilized 6 algorithms and achieved 43% accuracy.
